Everyday flexibility! Thanks to the new e-book glasses.

The new e-book glasses from Geldmacher

The e-book glasses feature a special lens with up to 10x magnification, enabling you to read very small, conventionally printed texts. However, they are especially helpful when using e-books or tablets. The self-illuminating surface offers additional contrast-related benefits.

The high magnification means that when using the glasses, the user must keep an optimal distance. To this end, a spacer has been integrated for support. At the same time, the built-in light source permits the glasses to be used even under poor lighting conditions.

The e-book glasses ideally complement telescope magnifying glasses if they are no longer strong enough for reading. This restores your ability to read texts such as package inserts, bank statements or bank details on invoices.

Restores your ability to read small print.

Helps you keep the right distance.

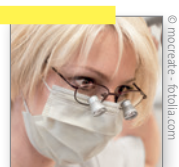

We offer everything - and more - for your eyes!
