Your new magnifying glasses and TV reading device from Geldmacher

Augenoptik Geldmacher is not only synonymous with reading glasses and aids to vision for specific eye diseases, but is also renowned as a specialist for surgical loupes for professional and home use as well as for TV reading devices. In recent years, we have been able to make a name for ourselves that has spread far beyond the country's borders.

Magnifying glasses – for optimum vision, relaxed working and the best results.

Our custom-made loupes offer cutting-edge technology, elegant design and precise workmanship for:

- ergonomically correct posture
- ideal vision quality thanks to the best optics
- the best possible wearing comfort due to lightweight construction

Telescopic loupes

Telescopic loupes are highly suitable for seeing distant objects larger. These telescopic systems can also be used for close-up work (reading, looking at photos, craftwork) in combination with magnifying glasses. They allow people whose eyesight is very poor due to many eye diseases to read, watch TV or do handicrafts once again.

Screen readers

An easy-to-use screen reader with optimised HD quality offers better imaging and clarity with a comfortable reading posture and individual settings. Even users with major visual impairment can efficiently look at text and illustrations or have it read out loud to them thanks to the innovative read-aloud function
