Experience the Geldmacher LowVision Centre for special corrective appliances e.g. for age-related macular degeneration, glaucoma, cataracts, retinitis pigmentosa (RP), diabetic retinopathy

Experience, expertise and attention

We discuss your sight in great detail, because each eye is unique. We do everything we can to understand exactly how we can help you in your own individual case.

Calm atmosphere

In an often hectic age, you look forward to a little rest. Eyes very rarely get a break.

We provide a pleasant calm atmosphere - for you and your eyes.

Cutting-edge technology

Specially trained opticians examine your eyes using the latest technology. In the „LowVision Centre“, we help visually impaired customers whose normal glasses are no longer satisfactory to regain some quality of life.

The measurement does not replace a visit to an ophthalmologist. Only an ophthalmologist can reliably detect whether you have age-related macular degeneration, glaucoma, retinitis pigmentosa etc. or not.
